18 April 1968

BRIEFING NOTICE

1. DCI is tentatively scheduled to testify for two hours, on or about 30 April, before the special Hardy Subcommittee of the House Armed Services Committee, on possible threats to the U.S., possible involvement of U.S. force, or possible invocation of U.S. commitments, in the areas generally described as "Eastern Europe, the Mediterranean, Near East, Middle East, and Scandinavia."

2. Chairman Rivers established the Hardy Subcom last fall, under Rep. Porter Hardy of Virginia, to conduct "a full and thorough inquiry into...the status of plans, including contingency plans, for achieving a military victory in SEA, the ability of our armed forces to simultaneously meet present commitments in SEA, as well as treaty obligations, including the availability of military equipment and present and projected force levels."

3. On 9 October DCI briefed the Hardy Subcom on Communist China, North and South Vietnam, Laos, Thailand, Cambodia, North and South Korea, Japan, Nationalist China, Indonesia, Hong Kong and British presence, Burma, and India.

4. The scope of the inquiry has now been greatly extended geographically by the rationale that the extent of U.S. commitment in Vietnam has a direct impact on and interreaction with U.S. commitments and interests on a global basis. Accordingly the Hardy Subcom has asked for the same type of briefing DCI gave them on SEA, to cover EE, Spain, the Soviet naval presence in the Mediterranean, Greece-Turkey-Cyprus, Arab-Israeli, Iran, and Scandinavia. A detailed outline is attached. It may be expanded after Legislative Counsel has checked it out with the subcommittee staff early next week.

5. DCI's terms of reference, of course, will be foreign--not U.S.--capabilities, intentions, objectives, etc., establishing a background for the Hardy Subcom inquiry into U.S. policies, commitments, capabilities which will subsequently be addressed primarily to DOD and State. His line of approach, depending on the country involved, will be the possibilities of U.S. involvement, or the potential enemy threat in the event of U.S. involvement---i.e., mainly the flap potential country by country, strengths, and any U.S. base problems.

Content and Mechanics:

6. Classification is limited to TOP SECRET---but the "fortified Top Secret"--as in the NIE's, make use of Codeword and other sensitive info as long as you don't specify details and facts which obviously could have come only from such sensitive sources and methods.

7. This briefing is not a primer, but a sitrep and prospects roundup at a fairly high level of sophistication. All but two of the Hardy Subcom members are also members of the Armed Services (Rivers) CIA Subcommittee, and Chairman Rivers and the ranking minority member, Representative Bates, will be sitting in as ex officio members.

8. Timing, etc. Contributions must reach Presentation Staff by close of business Tuesday, 23 April, to permit processing a book of this size (120 to 140 pages) in time to submit to DCI for review at oob Friday; Revisions and updates can be made over the 27/28 April week-end, and the exact date of briefing is still open.
